

*Taking comfort to a new level*

# Why buy an IQue hot tub? what you need to know

With the vast array of hot tub models on the market, it's hard to decide which suits you best isn't it?

So we thought we'd help with an upfront, short and sweet summary to explain why IQue Hot Tubs deserve to be checked out further.

## innovation

- Swedish inspired, contemporary, ergonomic and comfortable designs you'll love.
- IQue's energy efficient Triple Thermal Shield Insulation system saves you money on electricity bills.
- Designed in Sweden; we can't deny the Nordics are experts at this hot tub business can we?
- Smart, reliable and user friendly Balboa control panel - the world-renowned hot tub components manufacturer in the US.
- Heated air-blower (as opposed to cold air bubbles) for optimum user comfort.

## quality

- IQue has a first-class reputation and is a leading brand in Scandinavia.
- Every hot tub undergoes rigorous and comprehensive testing.
- Built from Aristech acrylic sheets - a globally recognised market leader.
- Fitted with contemporary stainless steel jets as standard - you won't need to upgrade from the plastic option.

*An intelligent choice  
at competitive prices*

## unique

- The Triple Thermal Shield Insulation system and floor-pan will enable you to use your hot tub all year round.
- Unique pre-assembled pipe-manifold has a resilient leak-free function.
- Designed for easy access for maintenance.
- Rigid ABS Floor pan ensures minimal heat loss and protects the equipment from ground-moisture.
- Only available from hand-picked reputable retailers that offer on-going professional support.

## enjoyment

- Relax and enjoy your therapeutic hot tub hydrotherapy experience, with optional Balboa bluetooth audio system to enjoy your favourite playlist.
- Remote automation app enables you to control the optional WiFi on Luxury models.
- Create a stylish ambience with LED colour-changing lighting paired with Midnight Opal or Sterling Silver acrylic shell.
- Each jet is in a carefully positioned spot to provide the best massage - adjust the direction, intensity and jet action to suit you.

# Impressive isn't it

The best overall value for money you will find with this combination of quality construction, features and wow factor.

All IQue dealers are handpicked and trained to deliver the best service. Visit your local dealer and take a seat in an IQue Hot Tub - you won't regret it.

## Hot Tub Cover

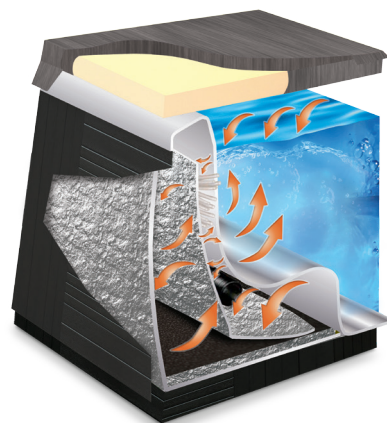

Grey to match hot tub cabinet

## Maintenance-Free Hot Tub Cabinet

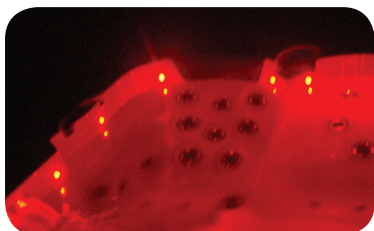

Grey

## Triple Thermal Shield Insulation

## LED colour-changing lighting

## 100% Self-cleaning system\*

\* Standard on the Luxury models only

## Stainless Steel Interchangeable Jets

To experience the full range of jet features, you can change to them achieve the relaxing or stimulating effect tailored to your needs. This includes: directional hydro-massage, rotary hydro-massage and precision jets.

A man and a woman are shown from the chest up, leaning their heads against each other in a relaxed pose. They appear to be in a hot tub, with water visible at the bottom of the frame. The man has a beard and is looking down, while the woman is smiling and looking towards him. The background is a soft, out-of-focus blue and white, suggesting a spa or outdoor setting.

# Hot Tubs are good for you

You are no doubt considering the relaxation and sociable benefits of owning a hot tub. There are many wellbeing and health reasons to consider too (if you need anymore justification!).

## **Soothe tired muscles, lower blood pressure and improve circulation**

The warm water relaxes and soothes your muscles and your natural buoyancy in the water relieves stress on your joints. The heat also increases blood flow which lowers your blood pressure and improves circulation, which brings many other benefits, including boosting your immune system.

## **Relieve stress, pain and sleep better**

Your time in the hot tub can help to improve your sleep and relieve pain by stimulating your body to produce endorphins. You can also target jets on particular pressure points around your body.

## **Recover from injuries and combat health conditions**

Low impact resistance training and hydrotherapy exercises help to relieve injuries, as well as arthritis and rheumatic conditions.

*IQue Hot Tubs are a  
Leading Brand in Scandinavia*

# Interchangeable Jets for the ultimate massage

All these jets are interchangeable - swap them around to give yourself a unique massage on targeted parts of your body. Massage Power Flex Jet inserts can be interchanged with Spinner Power or any combination, the choice is yours...

2" Wrist and neck/shoulder  
Power Flex Jets provide finger  
point massage (directional)

2" Spinning Power Flex Jets  
provide wide body massage

3" Deep Tissue Power Flex Jets provide  
finger point massage (directional)

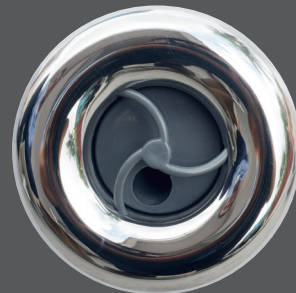

3" Spinner Power Flex Jets provide  
pulsating deep tissue massage

4" Directional Power Flex Jets  
provide deep tissue massage

4" Spinner Power Flex Jets provide  
pulsating deep tissue massage

# Behind the scenes the IQue Build Quality

Many hot tubs may look the same, but there are important differences, above and below the surface, that will impact upon your hot tub giving you years of reliable operation.

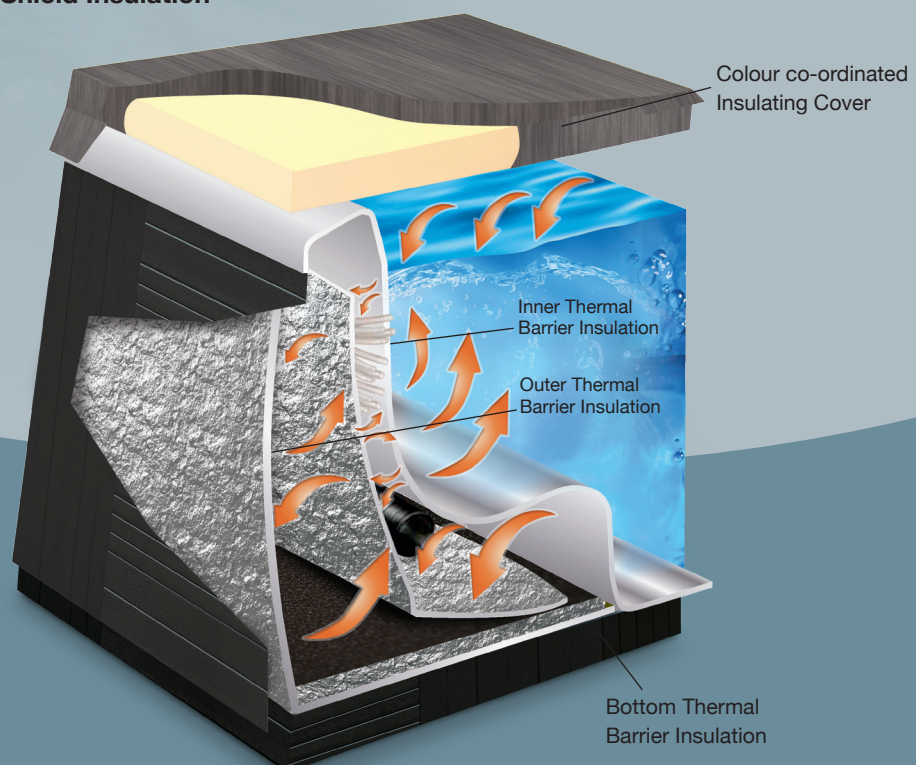

# IQue Hot Tub Advantages

## IQue Standards

Our aim is to provide you with the best quality, comfort and overall performance for a reasonable price. Some of the ways we achieve this are by:

- Setting up IQue production according to our highly efficient Swedish design and North American standards.
- Incorporating energy-efficient and a state-of-the-art Balboa control system.
- Using the latest thermoforming technology to ensure all areas of the hot tub are formed to be as strong as possible.
- Installing jets using torque technology - this silicone-free installation is far superior to avoid leaks.
- Well organised pipework that is easily accessible for maintenance.
- Adding our unique Triple Thermal Shield insulation and ABS floor-pan for energy efficiency.
- Pre-delivery extensive testing is carried out so your hot tub is guaranteed to be in perfect working order.

### Triple Thermal Shield Insulation

# Balboa Control Panel

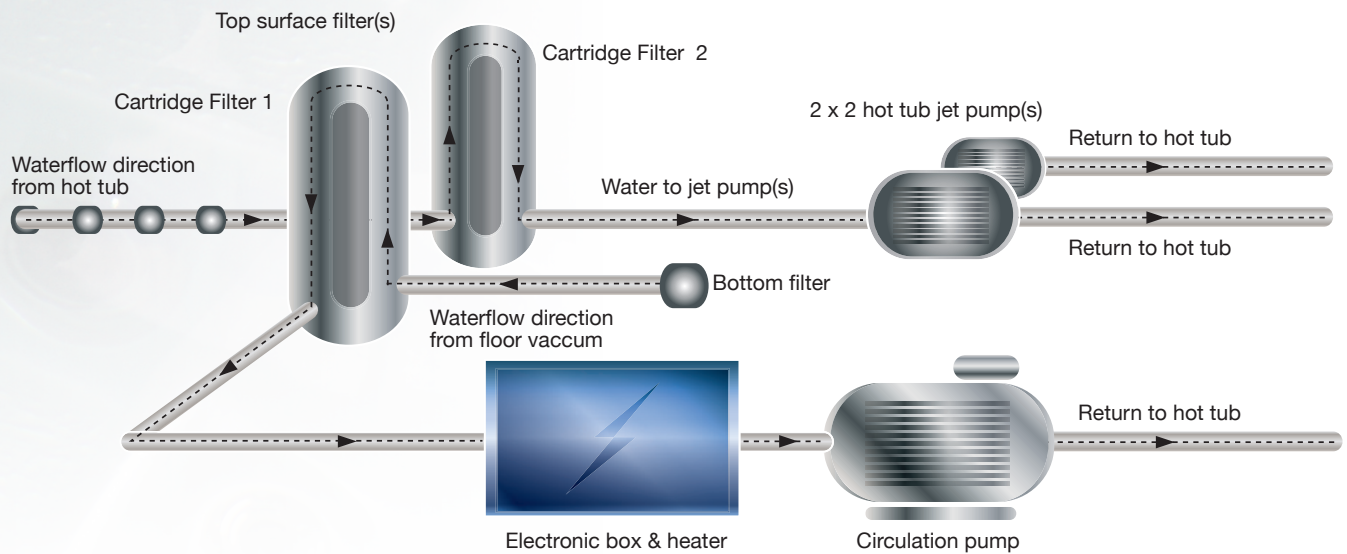

## world leading components

IQue Hot Tubs incorporates the most advanced, robust and simple to use soft-touch TP600 control panel from Balboa. One of the benefits is the flip function on the display. This allows the user to flip the display for ease of reading, whether in or out of the hot tub.

# IQue 100% Self-Cleaning System\*

IQue uses smart self-cleaning\* technology to give you wonderfully clean and pure water. Our Luxury range is equipped with the 100% Self-Cleaning System, so you can continue to relax and not worry about the cleaning the hot tub floor.

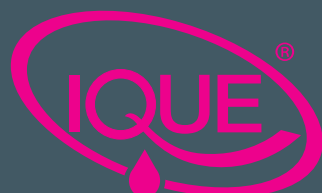

- Unlike other hot tubs the water is filtered from the top and the bottom surface of the tub (which means you don't have to regularly vacuum the floor).
- With dual filters installed on the IQue luxury models, you really will have incredibly pure, clear and clean water.

- The system cleanses 100% of the water approximately 5-6 times per hour depending on the size of the hot tub. So many alternative hot tub brands have water that bypasses the filter and is recirculated without cleaning.
- IQue's filtration pumps are widely regarded as the most reliable on the market. Whisper quiet and highly efficient, keeping your running costs to an absolute minimum.

\*Available on Luxury models only
